

Table1- Relationship between working hours and depression

Working hours	Model 1 Depression	Model 2 Depression	Model 3 Depression
≤48h	1	1	1
49-62h	1.13 (0.78~1.64)	1.10 (0.71~1.69)	1.12 (0.73~1.72)
P	0.514	0.672	0.612
63-77h	1.76 (1.25~2.50)	1.79 (1.78~2.72)	1.86 (1.22~2.83)
P	0.001	0.006	0.004
78-92h	1.75 (1.18~2.6)	1.81 (1.13~2.90)	1.94 (1.21~3.12)
P	0.005	0.014	0.006
≥93	2.84 (1.57~5.13)	4.29 (2.12~8.67)	1.17 (1.88~7.65)
P	0.001	<0.001	<0.001

Note: Model 1: Binary Logistic regression analysis;

Model 2: Multivariate Logistic regression analysis, adjusted for the different levels of occupational stress;

Model 3: Multivariate Logistic regression analysis, adjusted for whether had poor well-being.
