A corrigendum on

Taheebo Polyphenols Attenuate FFA-Induced Inflammation in Murine and Human Macrophage Cell Lines As Inhibitor of COX-2

by Ma S, Yada K, Lee H, Fukuda Y, Iida A, Suzuki K. *Front Nutr* (2017) 4:63. doi: 10.3389/fnut.2017.00063

In the article titled “Taheebo polyphenols attenuate FFA-induced inflammation in murine and human macrophage cell lines as inhibitor of COX-2” (1), there was an error regarding the protein PDB ID, which should be clarified as follows.

PDB ID for COX-2 protein used in the docking procedure is 5JVY (<https://www.rcsb.org/pdb/explore/explore.do?structureId=5JVY>), though in the article it was noted to be 4uxb.

The original article has been updated.
