KEYWORDS

genetic code, toroidal geometry, logical operators, Kronecker product, Hilbert space, block matrices, allometric property, genetic code entropy

A corrigendum on Algebraic and toroidal representation of the genetic code

by Rodríguez-Gutiérrez, R., Hernandez-Cabrera, F., Almaguer-Martínez, F. J., and Bernal-Alvarado, J. D. J. (2024). *Front. Appl. Math. Stat.* 10:1341158. doi: 10.3389/fams.2024.1341158

In the published article, there was an error in the legend for [Figure 8](#) as published. Toroidal mapping in polar coordinates shows the formation of vortex in the direction of amino acids which use codons with strong hydrogen bonds (SSS), light blue line, or weak (WWW), yellow line. The correct legend appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
