## A corrigendum on

### Nogo-A-deficient transgenic rats show deficits in higher cognitive functions, decreased anxiety, and altered circadian activity patterns

by Petrasek, T., Prokopova, I., Sladek, M., Weissova, K., Vojtechova, I., Bahník, S., Zemanova, A., Schönig, K., Berger, S., Tews, B., Bartsch, D., Schwab, M. E., Sumova, A., and Stuchlik, A. (2014). *Front. Behav. Neurosci.* 8:90. doi: 10.3389/fnbeh.2014.00090

In the paper by Petrasek et al., a mistake was made in the Acknowledgments Section. The corrected Acknowledgments follow:

## ACKNOWLEDGMENTS

This work was funded mainly by GAUK grant 365911 (awarded to Tomas Petrasek, which supported Tomas Petrasek, Iva

Prokopova, Štěpán Bahník, and Iveta Vojtechova), GACR P304/12/G069 (awarded to Ladislav Vyklicky, which supported Martin Sladek, Kamila Weissova, Alena Sumova, Tomas Petrasek, and Ales Stuchlik) and GACR 14-03627S (awarded to Ales Stuchlik, which supported Tomas Petrasek, Iveta Vojtechova, and Ales Stuchlik). Additional support came from IGA MZ CR NT13386 and AVCR M200111204 (awarded to Ales Stuchlik).

Support for foreign partners was provided by grants from the German Ministry for Education and Research (BMBF, 01GQ1003B), National Bernstein Network for Computational Neuroscience, HEALTH-F2-2007-201714 DEVANX (awarded to Dusan Bartsch) and the Grant Nr. 31-122527/1 (awarded to Martin E. Schwab). The work of Štěpán Bahník was partly supported by the Deutsche Forschungsgemeinschaft (DFG-RTG 1253/2).

**Conflict of Interest Statement:** The authors declare that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.
