A Corrigendum on Influences of cognitive load on center of pressure trajectory of young male adults with excess weight during gait initiation

by Kong L, Zhang Z, Bao J, Zhu X, Tan Y, Xia X, Zhang Q and Hao Y (2024). *Front. Bioeng. Biotechnol.* 11:1297068. doi: 10.3389/fbioe.2023.1297068

In the published article, there was an error in the legend for [Table 1](#) as published. The numerical value of an indicator “Preferred swing leg during GI,” which is only used to describe the characteristics of the participants and was not used in statistical analysis, was incorrectly input. The corrected [Table 1](#) appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

Publisher's note

All claims expressed in this article are solely those of the authors and do not necessarily represent those of their affiliated organizations, or those of the publisher, the editors and the reviewers. TABLE 1 General characteristics of participants.

Characteristics	Body weight			F-value	p-value
	Normal-weight (n = 12)	Overweight (n = 12)	Obese (n = 12)		
Age (years)	22.8 ± 2.7	22.9 ± 3.0	22.4 ± 2.5	0.113	0.894
Height (m)	1.72 ± 0.06	1.71 ± 0.04	1.73 ± 0.07	0.514	0.603
Weight (kg)	62.1 ± 7.7	74.5 ± 5.7	93.2 ± 8.1	56.246	<0.001 ^a
BMI (kg/m ²)	20.9 ± 1.5	25.6 ± 1.5	31.1 ± 1.4	152.577	<0.001 ^a
Preferred swing leg during GI					
Left	3	7	5	—	
Right	9	5	7		

^ap-values < 0.017 for normal-weight group vs. overweight group vs. obese group.
The meaning of the bold values is that significant statistical differences exist.
