## KEYWORDS

arterial stenosis, Doppler, duplex ultrasound, femoral artery, post-stenotic turbulence, vector flow imaging

## A corrigendum on

## Quantitative Evaluation of Post-stenotic Blood Flow Disturbance in Canine Femoral Artery Stenosis Model: An Early Experience With Vector Flow Imaging

by Zhao, R., Zheng, H., Wang, W., Du, Y., Tong, Y., and Wen, C. (2022). *Front. Cardiovasc. Med.* 9:829825. doi: 10.3389/fcvm.2022.829825

In the published article, there was an error in the Section **Materials and Methods**, subsection “*V Flow Ultrasound Assessment of Canine Femoral Artery*.” The equation for the Tur index calculation used by the ultrasound system was incorrectly displayed as:

$$Tur = \left( 1 - \frac{\sqrt{C^2 - S^2}}{N} \right) \times 100\%$$

The corrected equation appears below:

$$Tur = \left( 1 - \frac{\sqrt{C^2 + S^2}}{N} \right) \times 100\%$$

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
