## A Corrigendum on

### DEAD-Box Helicase DDX6 Facilitated RIG-I-Mediated Type-I Interferon Response to EV71 Infection

Zhang R, Cheng M, Liu B, Yuan M, Chen D, Wang Y and Wu Z (2021). *Front. Cell. Infect. Microbiol.* 11:725392. doi: 10.3389/fcimb.2021.725392

In the original article, there was an error. The conserved amino acid sequence of DEAD (Glu-Asp-Ala-Glu) in the first sentence of the abstract should be (Asp-Glu-Ala-Asp).

A correction has been made to the first sentence of the abstract section of our paper.

Corrected sentence: "Previous studies have shown that DEAD (Asp-Glu-Ala-Asp)-box RNA helicases play important roles in viral infection, either as cytosolic sensors of pathogenic molecules or as essential host factors against viral infection".

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
