## KEYWORDS

metagenomic next-generation sequencing, bronchoalveolar lavage fluid, community-acquired pneumonia, Illumina, nanopore, diagnostic value, pathogenic identification

## A Corrigendum on

[Clinical value of metagenomic next-generation sequencing by Illumina and Nanopore for the detection of pathogens in bronchoalveolar lavage fluid in suspected community-acquired pneumonia patients](#)

by Zhang J, Gao L, Zhu C, Jin J, Song C, Dong H, Li Z, Wang Z, Chen Y, Yang Z, Tan Y and Wang L (2022). *Front. Cell. Infect. Microbiol.* 12:1021320. doi: 10.3389/fcimb.2022.1021320

## Incorrect data availability statement

In the published article, there was an error in the Data Availability statement. The original Data Availability statement: The original contributions presented in the study are included in the article/supplementary material. Further inquiries can be directed to the corresponding authors.

The correct Data Availability statement appears below.

## Data availability statement

The datasets presented in this study can be found in online repositories. The names of the repository/repositories and accession number(s) can be found at <https://ngdc.cncb.ac.cn/omix/>, OMIX006862.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
