A Corrigendum on

An Autism-Associated *de novo* Mutation in GluN2B Destabilizes Growing Dendrites by Promoting Retraction and Pruning

by Bahry, J. A., Fedder-Semmes, K. N., Sceniak, M. P., and Sabo, S. L. (2021). *Front. Cell. Neurosci.* 15:692232. doi: 10.3389/fncel.2021.692232

The original article incorrectly did not include an Acknowledgments statement. The Acknowledgments Statement appears below.

We thank members of the Sabo lab, Mark Wacker and Mallary Greenlee-Wacker for helpful discussions. We thank Kellie Gallo for assistance with image analysis and for comments on the manuscript.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

Publisher's Note: All claims expressed in this article are solely those of the authors and do not necessarily represent those of their affiliated organizations, or those of the publisher, the editors and the reviewers. Any product that may be evaluated in this article, or claim that may be made by its manufacturer, is not guaranteed or endorsed by the publisher.
