## KEYWORDS

semiotic modes, semiotic resources, media, materiality, empirical multimodality research

## An Erratum on

[Refining concepts for empirical multimodal research: defining semiotic modes and semiotic resources](#)

by Castaldi J (2024). *Front. Commun.* 9:1336325. doi: 10.3389/fcomm.2024.1336325

Due to a production error, in section “**3. Semiotic Resources**” paragraph 9, the labels “ii)” and “iii)” were erroneously written as “i)” and “ii)” respectively. The corrected sentence should instead be: “At the level of discourse semantics, the 334 paradigmatic and syntagmatic structures have already taken *specific material configurations*, thus 335 achieving an ontological status that is the sum of strata ii) (paradigmatic and syntagmatic axes of 336 organisation) and iii) (semiotic resources).”

Due to a production error, the quotation formatting in section “**3. Semiotic Resources**” paragraph 9 was incorrect and was not correctly indented to show the quotation cited. The corrected version of this paragraph appears below:

“This material ontology of the individual discourse semantics of modes is also highlighted by Bateman (2011, p. 27, my emphasis):

Providing a formalised account of the kinds of semantics that applies for each semiotic mode, 344 together with a close mapping between properties of the articulated material and those semantics, 345 is the first step towards a well-founded account of the semantics of modes both individually and 346 in combination.”

The publisher apologizes for these mistakes. The original article has been updated.
