KEYWORDS

urban geological modeling, urban underground space, sequential simulation interpolation, geotechnical attribute model, Guang'an city

A Corrigendum on Lithology- based 3D modeling of urban geological attributes and their engineering application: A case study of Guang'an city, SW China

by Zhou F, Li M, Huang C, Liang H, Liu Y, Zhang J, Wang B and Hao M (2022). *Front. Earth Sci.* 10: 918285. doi: 10.3389/feart.2022.918285

In the published article, there were several errors in the captions for **Figures 2–6**. The correct captions appear below:

“FIGURE 2 | Semi-variogram model of sand.”

“FIGURE 3 | Workflow of 3D geological modeling.”

“FIGURE 4 | Simplified geological map of study area.”

“FIGURE 5 | Geotechnical units classification of Shaximiao formation (J2s) in study area.”

“FIGURE 6 | 3D geological model of Guang'an city (A) and fences diagram (B).”

The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
