KEYWORDS

prehistoric cooking, shell midden, mesolithic, microstratigraphy, mineralogy, aragonite, calcite, palaeotemperature

A Corrigendum on

[Thermo-microstratigraphy of shells reveals invisible fire use and possible cooking in the archaeological record](#)

by Simões CD and Aldeias V (2022). *Front. Earth Sci.* 10:869487. doi: [10.3389/feart.2022.869487](https://doi.org/10.3389/feart.2022.869487)

In the published article, there was an error in the **Funding** statement. In the original text, the code of the funding body that financed the publication fee was missing. The correct **Funding** statement appears below.

Funding

CS is currently funded by the European Union's Horizon 2020 research and innovation programme through a MSCA Widening Fellowship under Grant Agreement nr. SEArch - 101003409, and during the early stages of this research by a doctoral fellowship BES-2012-053695 granted by the Spanish Government. VA is funded by the Portuguese Fundação para a Ciência e Tecnologia (FCT), grant numbers PTDC/HAR 20 ARQ/29606/2017 and IF/01157/2015/CP1308/CT0002. Research at Cabeço da Amoreira was funded by FCT projects PTDC/HAH/64185/2006) and PTDC/HIS-ARQ/112156/2009 awarded to Nuno Bicho (University of Algarve). Research at Poças de São Bento was funded by the Spanish Government grants HAR2011-29907-C03-00 and HAR2014-51830-P, both awarded to Pablo Arias (University of Cantabria) and by FCT through grant PTDC/HIS-ARQ/121592/2010 awarded to Mariana Diniz (Universidade de Lisboa). Open Access to this article is financed by FCT – Fundação para a Ciência e a Tecnologia, within the scope of the project ICArEHB UIDP/04211/2020 IHC PROGRAMATICO.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
