## KEYWORDS

Scarabaeinae, arboreal, trees, tropical forests, dung

## A Corrigendum on

### The relationships between dung beetles and monkeys in the Neotropical region

by Halffter G and Favila ME (2023) *Front. Ecol. Evol.* 11:1212879. doi: 10.3389/fevo.2023.1212879

In the published article, there was an error. In the **Abstract**, we incorrectly referred to “arboreal monkeys” in the following sentence:

“In Australia and New Guinea, only some species of *Macropocopris* are described as being associated with arboreal monkeys, but in Borneo, several dung beetle species have been observed associated with arboreal monkeys, mostly in managed forests.”

We meant to refer to “arboreal marsupials”. The corrected sentence appears below:

“In Australia and New Guinea, only some species of *Macropocopris* are described as being associated with arboreal marsupials, but in Borneo, several dung beetle species have been observed associated with arboreal marsupials, mostly in managed forests.”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
