A Corrigendum on

Sex-Specific Differences in the Effect of Free Testosterone on Sarcopenia Components in Older Adults

By Shin HE, Walston JD, Kim M and Won CW (2021). *Front. Endocrinol.* 12:695614.
doi: 10.3389/fendo.2021.695614

In the original article as published, the titles of **Tables 1** and **2** were incorrect.

The correct title for **Table 1** is “Baseline characteristics according to the free testosterone quartiles”, not “Characteristics of patients at baseline” as published originally.

The correct title for **Table 2** is “Cross-sectional associations between baseline free testosterone levels and prevalence of sarcopenia in men (n=989)”, not “Characteristics of patients with EGFR-TKIs resistance who received immunotherapy or chemotherapy” as published originally.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
