## KEYWORDS

obesity, glucagon-like peptide 1 (GLP-1), cafeteria diet, lipolysis, white adipose tissue

## A corrigendum on

**Impact of short and long exposure to cafeteria diet on food intake and white adipose tissue lipolysis mediated by glucagon-like peptide 1 receptor**

by Mattar P, Jaque C, Teske JA, Morselli E, Kerr B, Cortés V, Baudrand R and Perez-Leighton CE (2023) *Front. Endocrinol.* 14:1164047. doi: 10.3389/fendo.2023.1164047

## Incorrect Affiliation

In the published article, there was an error in affiliation 8. Instead of “Department of Urology, Faculty of Medicine, Pontificia Universidad Católica de Chile, Santiago, Chile”, it should be “Centro Traslacional de Endocrinología UC CETREN, Pontificia Universidad Católica de Chile, Santiago, Chile”.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

## Conflict of interest

The authors declare that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.
