KEYWORDS

triglyceride-glucose index, change trajectory, chronic kidney disease, health check-up population, cohort study

A Corrigendum on

Relationship between the longitudinal trajectory of the triglyceride-glucose index and the development of CKD: an 8-year retrospective longitudinal cohort study

By Hou Q, Zhang H, Zhang R, Li B, Li L, Li D, Wang X, Liu Y, Wan Z, Zhang J and Shuai P (2024). *Front. Endocrinol.* 15:1376166. doi: 10.3389/fendo.2024.1376166

In the published article, there was an error in [Figure 4](#) as published. The red color indicates the high-level group and the green color indicates the medium-level stable group, which is now labeled the other way round. The corrected [Figure 4](#) and its caption appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
