A Retraction of the Original Research Article

Delineation of potential managed aquifer recharge sites of Kuchlak subbasin, Balochistan, using remote sensing and GIS

by Sardar H, Akhter G, Ge Y and Haider SA (2022). Front. Environ. Sci. 10:916504. doi: 10.3389/fenvs.2022.916504

The journal retracts the 22nd November 2022 publication.

Following concerns regarding the originality of the article, an investigation was conducted in accordance with Frontiers' policies. It was found that the article contains an unacceptable level of conceptual similarity to an article published by Hayat et al. (2021) in Acque Sotterranee–Italian Journal of Groundwater.

This retraction was approved by the Chief Editors of Frontiers in Environmental Science and the Chief Executive Editor of Frontiers. The authors did not agree to this retraction.
