shrinking cities, land urbanization, population urbanization, coupled coordination, spatial autocorrelation

A Corrigendum on
Coupling coordination and interactive relationship between population urbanization and land urbanization from the perspective of shrinking cities: a case study of Jiangsu province, China

by Chen S-J, Dai Q, Liu X-Y (2024). *Front. Environ. Sci.* 12:1423221. doi: 10.3389/fenvs.2024.1423221

In the published article, there was an error in the **Funding** statement where three sources of funding were omitted. The correct Funding statement appears below.

Funding

The author(s) declare that financial support was received for the research, authorship, and/or publication of this article. This work is funded by the Major Program of National Fund of Philosophy and Social Science of China (Fund No. 21 & ZD 183), Community Governance and Post-relocation Support in Cross-district Resettlement, the Fundamental Research Funds for the Central Universities (Fund No. B240207112) and the Fundamental Research Funds for the Central Universities (Fund No. B240207032).

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

Publisher's note

All claims expressed in this article are solely those of the authors and do not necessarily represent those of their affiliated

organizations, or those of the publisher, the editors and the reviewers. Any product that may be evaluated in this article, or claim that may be made by its manufacturer, is not guaranteed or endorsed by the publisher.
