Fungal Community, Not Substrate Quality, Drives Soil Microbial Function in Northeastern U.S. Temperate Forests

by Fitch, A. A., Lang, A. K., Whalen, E. D., Geyer, K., and Hicks Pries, C. (2020). *Front. For. Glob. Change* 3:569945. doi: 10.3389/ffgc.2020.569945

In the original article, we neglected to include the funders U.S. Department of Energy Genomic Science Program (DE-S0016590) and U.S. Department of Agriculture National Institute of Food and Agriculture through the New Hampshire Agricultural Experiment Station (Hatch 1003421) to S. D. Frey. The acknowledgments and funding statement should now read:

FUNDING

This work was supported as part of the Terrestrial Ecosystem Science Program by the Office of Science, Office of Biological and Environmental Research, of the U.S. Department of Energy under contract DE-SC0020228. In addition, KG and EW were supported by grants to S. D. Frey from the U.S. Department of Energy Genomic Science Program (DE-S0016590) and the U.S. Department of Agriculture National Institute of Food and Agriculture through the New Hampshire Agricultural Experiment Station (Hatch 1003421).

ACKNOWLEDGMENTS

We thank Owen Krol for help in the field and work on CUE optimization, Paul Zietz for running carbon and nitrogen analyses, Microbial ID for producing PLFA and NLFA data, the UC Davis Stable Isotope Facility for 18O data production, and the University of Wisconsin Biotechnology Center for DNA sequencing.

In the published article, there was an error regarding the affiliation(s) for **Kevin Geyer**. As well as having affiliation(s) **3**, they should also have **2 as the primary affiliation**.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
