antifungal proteins and peptides, fungal pathogens, fungal infection, antifungal resistance, structure-function relation, antifungal mode of action

A Corrigendum on

Navigating the fungal battlefield: cysteine-rich antifungal proteins and peptides from Eurotiales

By Holzknecht J and Marx F (2024) *Front. Fungal Biol.* 5:1451455. doi: 10.3389/ffunb.2024.1451455

In the published article, there were few errors in **Table 1** as published. The heading “pI at pH 7” is wrong. The correct heading is “pI”. The heading “Lys/His/Arg” is wrong. The correct heading is “Lys/Arg/His”. *Aspergillus giganteus* was listed with the strain identification number “MDH18894”. *Aspergillus giganteus* should be listed without strain identification number. The numbers 4/1/4 for Lys/Arg/His of BP from *Penicillium brevicompactum* is wrong. The correct numbers are 4/4/1. The MW 8.1 indicated for PeAfpC from *Penicillium expansum* is wrong. The correct MW is 6.7. **Table 1** appears below.

The authors apologize for this errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
