KEYWORDS

IgA nephropathy, complement factor B, case-control study, alternative pathway, polymorphism

A Corrigendum on:

Functional variant rs12614 in *CFB* confers a low risk of IgA nephropathy by attenuating complement alternative pathway activation in Han Chinese.

By Shi D-C, Feng S-Z, Zhong Z, Cai L, Wang M, Fu D-Y, Yu X-Q, Li M. (2022) *Front Immunol.* 13:973169. doi: 10.3389/fimmu.2022.973169.

In the published article, there was an error regarding the affiliations for all authors. As well as having affiliation 1, they should also have “²NHC Key Laboratory of Clinical Nephrology (Sun Yat-sen University) and Guangdong Provincial Key Laboratory of Nephrology, Guangzhou, China”.

The author Ming Li should also have “³Division of Nephrology, Guangdong Provincial People's Hospital, Guangdong Academy of Medical Sciences, Guangzhou, China”.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
