A Corrigendum on

Glucagon-Like Peptide-1 Receptor Regulates Macrophage Migration in Monosodium Urate-Induced Peritoneal Inflammation

By Chen J, Mei A, Liu X, Braunstein Z, Wei Y, Wang B, Duan L, Rao X, Rajagopalan S, Dong L and Zhong J (2022). *Front. Immunol.* 13:772446. doi: 10.3389/fimmu.2022.772446

In the original article, there was an error in the statement of the source of GLP-1R knockout mice (KO).

A correction has been made to **Materials and Methods**, “Animals”:

C57BL/6 mice (wild-type, WT), GLP-1R^{Cre}, and ROSA26^{EGFP} mice in C57BL/6 background were purchased from the Jackson Laboratory. GLP-1R knockout mice (KO) were generated by crossing CMV-Cre mice with GLP-1R^{lox/lox} mice (1), a generous gift from Dr. Randy Seeley’s lab. GLP-1R^{EGFP} reporter mice were generated by crossing GLP-1R^{Cre} with ROSA26^{EGFP} mice.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
