A corrigendum on

Broad distribution and high proportion of protein synthesis active marine bacteria revealed by click chemistry at the single cell level

by Samo, T. J., Smriga, S., Malfatti, F., Sherwood, B.P., and Azam, F. (2014). *Front. Mar. Sci.* 1:48. doi: 10.3389/fmars.2014.00048

The authors wish to include the following section to recognize the support that made this paper possible:

ACKNOWLEDGMENTS

We would like to thank Jon Cheng and Joseph Villareal for laboratory

assistance. We greatly appreciate the helpful suggestions of Peter Franks, the seagoing access and assistance provided by Mark Ohman, and the captain and crew of the R/V Robert Gordon Sproul. This work was funded by grants from the Gordon and Betty Moore Foundation Marine Microbial Initiative (grant #2758) and the National Science Foundation (award OCE0962721) to Farooq Azam, and a National Science Foundation Ocean Sciences Postdoctoral Research Fellowship to Steven Smriga.

Conflict of Interest Statement: The authors declare that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.

Received: 16 October 2014; accepted: 21 October 2014; published online: 10 November 2014.
