A Corrigendum on:

Large Vessel Activity and Low-Frequency Underwater Sound Benchmarks in United States Waters

By Haver SM, Adams JD, Hatch LT, Van Parijs SM, Dziak RP, Haxel J, Heppell SA, McKenna MF, Mellinger DK and Gedamke J (2021) *Front. Mar. Sci.* 8:669528. doi: 10.3389/fmars.2021.669528

In the original article, there was a mistake in **Supplementary Table 1** as published. The headings for the 63 Hz and 125 Hz sound pressure levels were reversed for each measurement (median, maximum, and minimum). The corrected **Supplementary Table 1** is published online.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
