KEYWORDS

glacial freshwater, cell carbon biomass, Antarctic shallow fjords, diatoms, nanophytoflagellates, phytoplankton size fractions

A Corrigendum on

[Importance of nanophytoplankton biomass during summer 2019 in a retreating marine-terminating glacier-fjord system, Marian Cove, West Antarctica \(62°S\)](#)

by Jeon M, Iriarte JL, Yang EJ, Park J, Alves-de-Souza C and Park SJ (2023) *Front. Mar. Sci.* 10:1174722. doi: 10.3389/fmars.2023.1174722

Additional Affiliation(s)

In the published article, there was an error regarding the affiliations for Misa Jeon. As well as having affiliation 1, Division of Ocean Sciences, Korea Polar Research Institute, Incheon, Republic of Korea, they should also have affiliation 2, Department of Biological Sciences and Bioengineering, Inha University, Incheon, Republic of Korea.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
