KEYWORDS

airway obstruction, first-pass success, intubation-related adverse events, emergency department, adults

A corrigendum on

[Association of airway obstruction with first-pass success and intubation-related adverse events in the emergency department: multicenter prospective observational studies](#)

by Takahashi, J., Goto, T., Fujitani, S., Okamoto, H., Hagiwara, Y., Watase, H., Hasegawa, K., and the Japanese Emergency Medicine Network Investigators (2023). *Front. Med.* 10:1199750. doi: 10.3389/fmed.2023.1199750

In the published article, there was an error in the Ethics statement. The registries' institutional review boards of Kurashiki Hospital and St. Luke's Hospital were listed, not the institutional review board to which the first author belongs. "The protocols for the studies were approved by the Ethics Committees of Kurashiki Central Hospital (approval number 851-2) and St. Luke's International Hospital (approval number 19-R212). Written informed consent for participation was not required for these studies in accordance with the institutional requirements." The correct Ethics statement appears below.

"The protocols for the studies were approved by the Ethics Committees of Tokyo Bay Urayasu Ichikawa Medical Center (approval number of JEAN-2 873, approval number of JEAN-5 533). Written informed consent for participation was not required for these studies in accordance with the institutional requirements."

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
