KEYWORDS

Ehlers-Danlos syndrome, anxiety, psychosomatic medicine, reliability, validity, joint hypermobility, neuroconnective endophenotype

A corrigendum on

[Validation of the neuroconnective endophenotype questionnaire \(NEQ\): a new clinical tool for medicine and psychiatry resulting from the contribution of Ehlers–Danlos syndrome](#)

by Bulbena, A., Rosado, S., Cabaleiro, M., Martinez, M., Baeza-Velasco, C., Martin, L.-M., Batlle, S., and Bulbena-Cabr , A. (2023). *Front. Med.* 10:1039223. doi: 10.3389/fmed.2023.1039223

In the published article, there was an error regarding the affiliations for Silvia Rosado. As well as having affiliation 2, they should also have “Doctorate Program in Psychiatry, Department of Psychiatry and Forensic Medicine, Universitat Aut noma Barcelona, Barcelona, Spain”. Silvia Rosado’s affiliations are now 2 and 3.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
