## KEYWORDS

Raša coal, microbial diversity, estuary, PAHs, hazardous trace elements, natural attenuation

## A corrigendum on

## Contaminants from a former Croatian coal sludge dictate the structure of microbiota in the estuarine (Raša Bay) sediment and soil

by Zhang, W., Mo, Q., Huang, Z., Sabar, M. A., Medunić, G., Ivošević, T., He, H., Urynowicz, M., Liu, F.-J., Guo, H., Haider, R., Ali, M. I., and Jamal, A. (2023). *Front. Microbiol.* 14:1126612. doi: 10.3389/fmicb.2023.1126612

In the published article, there was an error in the **Funding** statement. The grant number “2019XKQYMS57” for Fundamental Research Funds for the Central Universities of China was incorrect. The correct Funding statement appears below.

## Funding

This work was supported by National Key Research and Development Program of China (2019YFC1805400 and 2021YFC2902603), Fundamental Research Funds for the Central Universities of China (2021ZDPY0210 and 2022ZZCX01K1), National Natural Science Foundation of China (No. 42172187), and Key Research Development Program of Modern Agriculture (KC21137).

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
