KEYWORDS

phenotype drug screening (PDS), regeneration, zebrafish, axon, M-cell

A Corrigendum on

Phenotype-based drug screening: An *in vivo* strategy to classify and identify the chemical compounds modulating zebrafish M-cell regeneration

by Kumari A, Zeng X-A, Rahaman A, Farooq MA, Huang Y, Alee M, Yao R, Ali M, Khalifa I and Badr O (2022). *Front. Mol. Biosci.* 9:984461. doi: [10.3389/fmolb.2022.984461](https://doi.org/10.3389/fmolb.2022.984461)

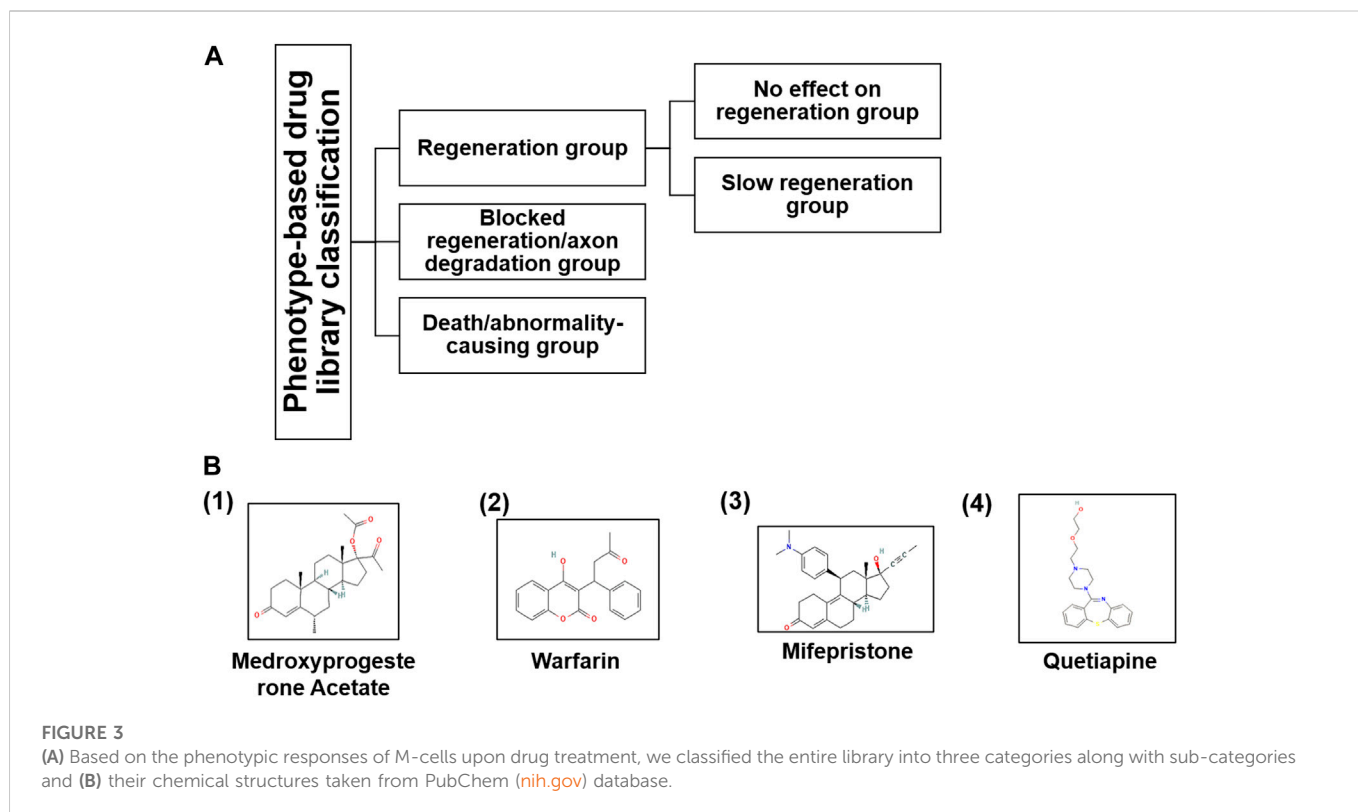

In the published article, there was an error in the legend for **Tables 3, 4** as published. The corrected table legends appear below.

TABLE 3 Table representing binding affinity and inhibition constant for the interaction of four drugs with SOCS3.

TABLE 4 Table representing binding affinity and inhibition constant for the interaction of four drugs with PTEN.

In the published article, there was an error in **Table 1 and Figure 3** as published. Table 1 and its caption were duplicated in Figure 3. The corrected **Figure 3** and its caption appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
