A Corrigendum on

CipaglucoSIDase alfa plus miglustat: linking mechanism of action to clinical outcomes in late-onset Pompe disease

by Byrne, B. J., Parenti, G., Schoser, B., van der Ploeg, A. T., Do, H., Fox, B., Goldman, M., Johnson, F. K., Kang, J., Mehta, N., Mondick, J., Sheikh, M. O., Sitaraman Das, S., Tuske, S., Brudvig, J., Weimer, J. M., and Mozaffar, T. (2024). *Front. Neurol.* 15:1451512. doi: 10.3389/fneur.2024.1451512

In the published article, there was an error in [Figure 13](#) as published. The error relates to the positive/negative value of some of the numbers on the axes for the lower MMT score and the GSGC total score in [Figure 13A](#). For both lower MMT score and GSGC total score, the axis scale incorrectly read $-3, -2, 1, 0, -1, -2, -3$ from left to right, whereas the axis scale for lower MMT score should have been $-3, -2, -1, 0, 1, 2, 3$ and the axis scale for GSGC total score should have been $3, 2, 1, 0, -1, -2, -3$. The corrected [Figure 13](#) and its caption appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
