protein, fat, carbohydrate, mice, strain, variation

## A corrigendum on

**Increased variation in body weight and food intake is related to increased dietary fat but not increased carbohydrate or protein in mice**

by Wu, Y., Hu, S., Yang, D., Li, L., Li, B., Wang, L., Li, M., Wang, G., Li, J., Xu, Y., Zhang, X., Niu, C., and Speakman, J. R. (2022). *Front. Nutr.* 9:835536. doi: 10.3389/fnut.2022.835536

In the published article, there was an error in affiliation [4]. Instead of “Beijing Advanced Innovation Center for Food Nutrition and Human Health, Beijing Engineering and Technology Research Center of Food Additives, National Soybean Processing Industry Technology Innovation Center, Beijing, China,” it should be “Beijing Advanced Innovation Center for Food Nutrition and Human Health, Beijing Engineering and Technology Research Center of Food Additives, National Soybean Processing Industry Technology Innovation Center, Beijing Technology and Business University, Beijing, China.”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
