## KEYWORDS

prostate cancer, radical prostatectomy (RP), survival time, logistic model, receiver operating characteristic curve (ROC curve)

## A Corrigendum on

### Analysis of factors associated with positive surgical margins and the five-year survival rate after prostate cancer resection and predictive modeling

By Li K, Zhang Y, Tian S, Su Q, Mei Y, Shi W, Cao J and Song L (2024). *Front. Oncol.* 14:1360404. doi: 10.3389/fonc.2024.1360404

In the published article, there was an error in affiliations 1 and 2. Instead of “Affiliated Hospital of Binzhou Medical College”, it should be “Binzhou Medical University Hospital”. The same affiliations have been updated in *Methods, 2.1 General information*, paragraph 1.

In the published article, there was an error in the Ethics statement. The study was reviewed and approved by the Ethics Committee of the Affiliated Hospital of Binzhou Medical College (LW-99). The correct Ethics statement appears below and the same has been updated in the *Methods, 2.1 General information*, paragraph 1.

## Ethics statement

The study was reviewed and approved by the Ethics Committee of Binzhou Medical University Hospital (LW-99), and all patients and their families gave informed consent. The studies were conducted in accordance with the local legislation and institutional requirements. Written informed consent for participation in this study was provided by the participants' legal guardians/next of kin.

The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
