A Corrigendum on

Case report: Possible role of low-dose PEM for avoiding unneeded procedures associated with false-positive or equivocal breast MRI results

By Rapley M, Freitas V, Weinberg IN, Baldassi B, Poladyan H, Waterston M, Ghai S, Taeb S, Bubon O, Reznik A and Mulligan AM (2024). *Front. Oncol.* 14:1405404. doi: 10.3389/fonc.2024.1405404

In the published article, there was an error in the author list order. When author Anna Marie Mulligan was added, she was erroneously listed as the final author when that position should have been for the primary investigator, Alla Reznik.

The correct author list and affiliations should be:

"Madeline Rapley¹ *, Vivianne Freitas², Irving N. Weinberg³, Brandon Baldassi⁴, Harutyun Poladyan¹, Michael Waterston⁴, Sandeep Ghai², Samira Taeb⁵, Oleksandr Bubon^{1,4}, Anna Marie Mulligan⁶ and Alla Reznik^{1,7}."

¹ Department of Physics, Lakehead University, Thunder Bay, ON, Canada, ²Temerty Faculty of Medicine, Joint Department of Medical Imaging, University of Toronto, Toronto, ON, Canada, ³Weinberg Medical Physics, Rockville, MD, United States, ⁴Radialis Inc., Thunder Bay, ON, Canada, ⁵Department of Research, Princess Margaret

Cancer Centre, University Health Network, Toronto, ON, Canada, 6 Laboratory Medicine Program, University Health Network – Toronto General Hospital Site, University of Toronto, Toronto, ON, Canada, 7Thunder Bay Regional Health Sciences Centre, Thunder Bay, ON, Canada."

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
