## KEYWORDS

pulmonary mucinous epidermoid carcinoma, clinical characteristics, prognosis, Surveillance, Epidemiology, and End Results (SEER), nomogram

## A Corrigendum on

## Clinical characteristics and prognosis of patients with pulmonary mucoepidermoid carcinoma: a SEER-based analysis

By Qiu L, Song P, Chen P, Wang H, Li F, Shu M, Gong G-c, Song X, Huang C, Jia H, Li N and Zhang G (2021). *Front. Oncol.* 11:601185. doi: 10.3389/fonc.2021.601185

In the published article, there was an error. In the “*Methods*” section of the **Abstract**, an error was present. It was my oversight that led to the incorrect date being written.

A correction has been made to **Abstract**, *Methods*, Paragraph 1. This sentence previously stated:

“In the Surveillance, Epidemiology, and End Results database from January 1, 2016 to December 31, 2016, patients pathologically diagnosed with P MEC were identified.”

The corrected sentence appears below:

“In the Surveillance, Epidemiology, and End Results database from January 1, 1975 to December 31, 2016, patients pathologically diagnosed with P MEC were identified.”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
