KEYWORDS

Hallermann-Streif syndrome, NIV (non-invasive ventilation), OSAS (Obstructive sleep apnea syndrome), infant, success

A Corrigendum on

Long term NIV in an infant with Hallermann-Streif Syndrome: a case report and overview of respiratory morbidity

By Guerin S, Blanchon S, de Halleux Q, Bayon V, Ferry T. (2022) Front Pediatr. 10:1039964. doi: 10.3389/fped.2022.1039964

Error in Figure:

In regard to Figure 2, the parents of the child depicted in the photos provided their written consent for publication in 2022. However, they now wish to have the photos removed from the article because they have been indexed by general search engines and are appearing on the internet beyond specialized medical websites.

On behalf of the parents, and with the agreement of all authors, we respectfully request the removal of Figure 2 (including the photos and caption) from the article.

Text Correction:

Dut to the removal of Figure 2, citation relatives to Figure 2 have been removed from the text.

A correction has been made to the **Case** section.

This sentence previously stated:

“Figure 2 displays photos of the patient with and without NIV.”

This sentence has now been removed.
