A Corrigendum on

Vitamin B12 Enhances Nerve Repair and Improves Functional Recovery after Traumatic Brain Injury by Inhibiting ER Stress-Induced neuron injury

by Wu, F., Xu K., Liu, L., Zhang, K.-R., Xia, L.-L., Zhang, M., Teng, C.-H., Tong, H.-Y., He, Y.-F., Xue, Y.-J., Zhang, H.-Y., Chen, D.-Q., Hu, A.-P. (2019). Front. Pharmacol. 10, 406. doi:10.3389/fphar.2019.00406

In the original article, there was a mistake in **Figure 4P** as published. The corrected **Figure 4** appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way.

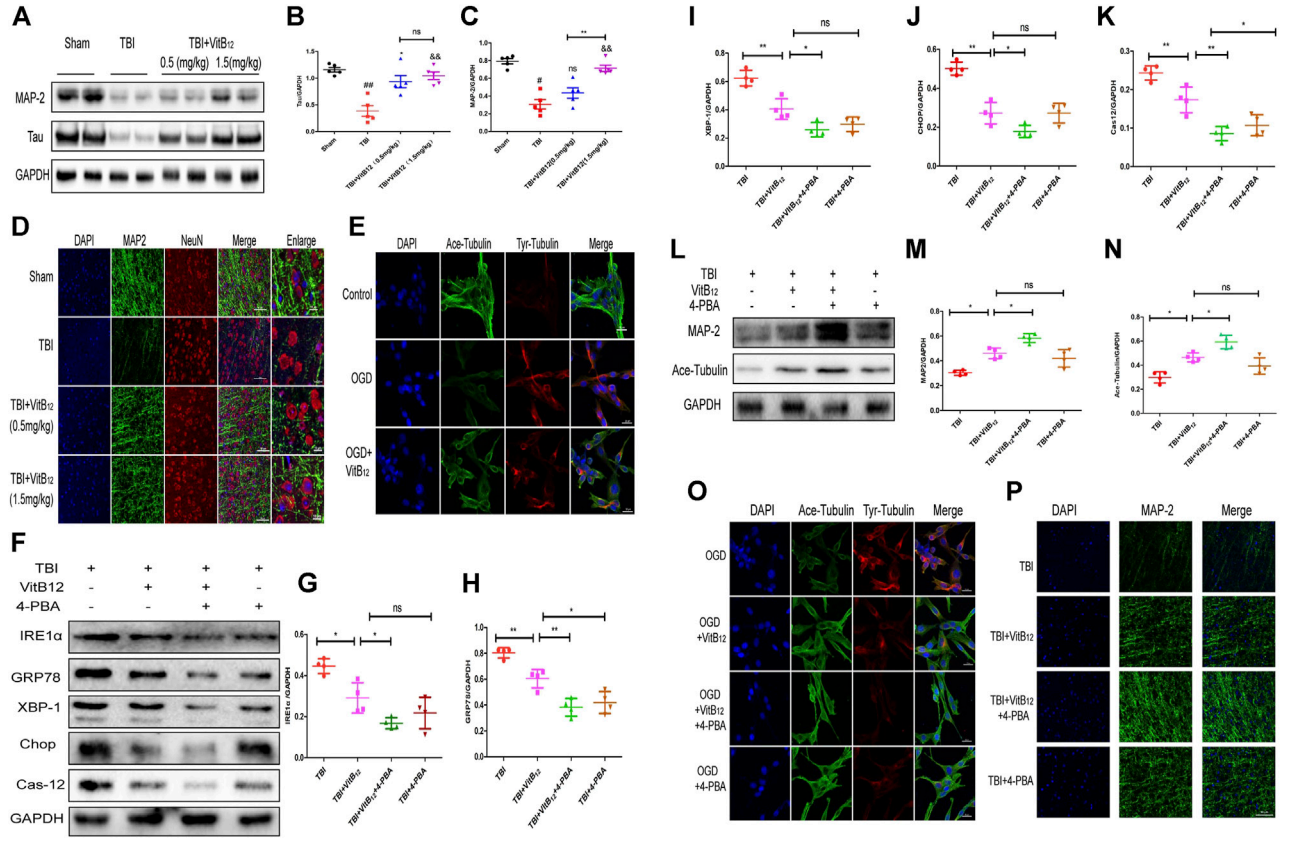

FIGURE 4 | Vitamin B12 inhibits microtubule damage through ER stress after TBI. **(A)** Representative western blots of the expression of MAP-2, Tau. **(B, C)** Quantification from **(A)**.##$p < 0.01$, #$p < 0.05$ vs. the sham group. *$p < 0.05$, && $p < 0.01$ vs. the TBI group. **$p < 0.01$ vs. the indicated group. Values represent the mean ± SEM, n = 5. **(D)** Representative fluorescent images depicting MAP-2 (green) with NeuN (red) in the cortex after TBI. Scale bar = 50 μm, scale bar = 10 μm. **(E)** Representative fluorescent images depicting Ace-tubulin(green) with Tyr-tubulin(red) in the PC 12 cells. Scale bar = 20 μm. **(F)** Representative western blots of the expression of IRE1α, GRP78, XBP-1, Chop, Cleaved-cas12. **(G–K)** Quantification from **(F)**$*p < 0.05$, $**p < 0.01$ and $***p < 0.001$ vs. the indicated group. Values represent the mean ± SEM, n = 4. **(L)** Representative western blots of the expression of MAP-2, Ace-tubulin. **(M–N)** Quantification from **(L)**.$*p < 0.05$ vs. the indicated group. Values represent the mean ± SEM, n = 4. **(O)** Representative fluorescent images depicting Ace-tubulin(green) with Tyr-tubulin(red) in the PC 12 cells. Scale bar = 20 μm. **(P)**. Representative fluorescent images depicting MAP-2 (green) *in vivo*. Scale bar = 50 μm.
