## KEYWORDS

endometriosis, adenomyosis, environmental toxicants, endocrine disrupting chemical (EDC), inflammation

## A Corrigendum on

**The potential relationship between environmental endocrine disruptor exposure and the development of endometriosis and adenomyosis**

by Stephens VR, Rumph JT, Ameli S, Bruner-Tran KL and Osteen KG (2022). *Front. Physiol.* 12:807685. doi: [10.3389/fphys.2021.807685](https://doi.org/10.3389/fphys.2021.807685)

In the published article, there was an error in the **Funding** statement. The authors omitted the disclaimer, which is required by the U.S. EPA, from their Funding statement. The EPA grant number was also incomplete and was listed as “R839501.”

“This work was supported by the National Institute of General Medical Sciences of the National Institutes of Health under Award Number T32GM007628 (JR), Training Program in Environmental Toxicology under award number TOX T32 ES007028 (VS), Bill and Melinda Gates Foundation (KB-T and KO), and U.S. Environmental Protection Agency #R839501 (KB-T and KO), R01HD096147 (KB-T and KO).”

The correct **Funding** statement appears below.

“The potential relationship between environmental endocrine disruptor exposure and the development of endometriosis and adenomyosis” was developed under Assistance Agreement No. RD83950101 awarded by the U.S. Environmental Protection Agency to KO. It has not been formally reviewed by EPA. The views expressed in this document are solely those of VS, JR, SA, KB-T, and KO and do not

necessarily reflect those of the Agency. EPA does not endorse any products or commercial services mentioned in this publication.”

The authors apologize for this errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
