## KEYWORDS

C<sub>4</sub> photosynthesis, C<sub>3</sub> photosynthesis, photosynthetic induction, CO<sub>2</sub> assimilation, photorespiration, non-steady state, light response

## A Corrigendum on

Activation of CO<sub>2</sub> assimilation during photosynthetic induction is slower in C<sub>4</sub> than in C<sub>3</sub> photosynthesis in three phylogenetically controlled experiments

By Arce Cubas L, Vath RL, Bernardo EL, Sales CRG, Burnett AC and Kromdijk J (2023) *Front. Plant Sci.* 13:1091115. doi: 10.3389/fpls.2022.1091115

In the published article, there was an error in the affiliation(s) for Emmanuel L. Bernardo. As well as having affiliation 1, they are also affiliated to University of the Philippines Los Baños, Institute of Crop Science, College of Agriculture and Food Science, College, Laguna, Philippines.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
