anxiety, COVID-19, Omicron, pandemic, sequelae

## A corrigendum on

[Increased anxiety from fear of Omicron in China as compared to North America and Western Europe: A cross-sectional Kendall's tau-b analysis using the generalized anxiety disorder 7-item questionnaire](#)

by Shan, D., Liu, C., Li, S., and Zheng, Y. (2022). *Front. Psychiatry* 13:977361.  
doi: 10.3389/fpsy.2022.977361

In the original article, there was a statistical error in the **Materials and Methods** section, page 4. The text read as “Eventually, a valid sample of 1,500 participants was analyzed collectively (892 females and 192 males; mean age = 26.74 years, SD = 3.81 years; age range: 18–34 years).” The statement has been corrected as follows:

“Eventually, a valid sample of 1,500 participants was analyzed collectively (688 females and 812 males; mean age = 26.74 years, SD = 3.81 years; age range: 18–34 years).”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
