# Corrigendum: Over-specification of small, borderline cardinalities and color in referential communication: the role of visual context, modifier position, and consistency

Natalia A. Zevakhina\*, Kseniya N. Dongarova, Daria Shubina and Daria P. Popova

HSE University, Moscow, Russia

## KEYWORDS

over-specification, referential communication, cardinalities, color, modifier position, consistency

## A Corrigendum on

[Over-specification of small, borderline cardinalities and color in referential communication: the role of visual context, modifier position, and consistency](#)

by Zevakhina, N. A., Dongarova, K. N., Shubina, D., and Popova, D. P. (2024). *Front. Psychol.* 15:1417047. doi: 10.3389/fpsyg.2024.1417047

In the published article, there was an error. The words “Same” and “Different” should be interchanged, as stated below.

A correction has been made to **3.3.3 Visual contexts for color and small cardinalities**, second paragraph. This sentence previously stated:

As seen in Figure 6, cardinality over-specification was higher in the Same Color and Cardinality condition than in the Different Color and Cardinality condition ( $W = 640,828$ ,  $p < 0.0001$ ).

The corrected sentence appears below:

As seen in Figure 6, cardinality over-specification was higher in the Different Color and Cardinality condition than in the Same Color and Cardinality condition ( $W = 640,828$ ,  $p < 0.0001$ ).

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
