KEYWORDS

homelessness, prevention, vaccine acceptance, vaccine hesitancy, vaccine access, COVID-19, primary care, access to health care

A corrigendum on

[Determinants of COVID-19 vaccine acceptance and access among people experiencing homelessness in Germany: a qualitative interview study](#)

by Grune, J., Savelsberg, D., Kobus, M., Lindner, A. K., Herrmann, W. J., and Schuster, A. (2023). *Front. Public Health* 11:1148029. doi: 10.3389/fpubh.2023.1148029

In the published article, there was an error. We noticed a spelling mistake in the description of a framework we used for our data analysis.

A correction has been made to the **section 2) Materials and methods, sub-section 2.1) Study design**, in the first sentence of the second paragraph. This sentence previously stated:

“Therefore, the interview guideline was developed theory-based by DS using the “5 psychological antecedents of vaccination” by Betsch (29) and the “Theory of Access” by Saurman (19).”

The corrected sentence appears below:

“Therefore, the interview guideline was developed theory-based by DS using the “5C psychological antecedents of vaccination” by Betsch (29) and the “Theory of Access” by Saurman (19).”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
