A corrigendum on

[Adolescents' perceptions and user experiences with a virtual reality-based alcohol prevention tool in Germany: A focus group study](#)

by Hrynyschyn, R., Prediger, C., Lyk, P., Majgaard, G., Helmer, S. M., and Stock, C. (2023). *Front. Public Health*. 11:1054015. doi: 10.3389/fpubh.2023.1054015

In the published article, there was an error in the funding statement. We did not state that the development of the virtual application that was tested in the study (Virtual LimitLab) was co-funded by a donation from TrygFonden, who funded the development of the original Danish version VR FestLab. The funding statement was originally written as follows: The research project was funded by Stiftung Charité (file number WIS_PRO_619). The study sponsor and funders had no role in the study design, data collection, data management, data analysis, data interpretation, or report writing or in the decision to submit the report for publication.

The correct Funding statement appears below.

Funding

The present research was funded by Stiftung Charité, file number WIS_PRO_619. The development of the Danish Version VR FestLab was funded by TrygFonden, Denmark, grant number ID 122827. The study sponsor and funders had no role in the study design, data collection, data management, data analysis, data interpretation, or report writing or in the decision to submit the report for publication.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
