A corrigendum on

Understanding multiple dimensions of perceived greenspace accessibility and their effect on subjective well-being during a global pandemic

by Maurer, M., Cook, E. M., Yoon, L., Visnic, O., Orlove, B., Culligan, P. J., and Mailloux, B. J. (2021). Front. Sustain. Cities 3:709997. doi: 10.3389/frsc.2021.709997

In the published article, there was an error. The Methods section incorrectly states the number of interviews analyzed as 74.

A correction has been made to **Section 2. Methods**, "*2.3 Interview*," Paragraph 1. This sentence previously stated:

"The total number of individuals contacted for interviews was 356 and the total number of completed interviews was 74."

The corrected sentence appears below:

"The total number of individuals contacted for interviews was 356 and the total number of completed interviews was 72."

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
